

HW08: More kernels

Hand in at: <http://www.cs.utah.edu/~hal/handin.pl?course=cs726>. Remember that only PDF submissions are accepted. We encourage using L^AT_EX to produce your writeups. See `hw00.tex` for an example of how to do so. You can make a `.pdf` out of the `.tex` by running “`pdflatex hw00.tex`”.

1. Write out the *averaged* kernelized perceptron training algorithm. Feel free to do the unbiased version.
