Supplemental Course Evaluation Questions
Session 29: Making Meaning

1. How should the readings be changed for next semester?
2. One goal of the three-person team projects was to encourage you to learn from each other. How well did that work?
3. How could we have focused more throughout the semester on the “big question” of how to do big things?
4. What comments do you have on our teaching assistants?
5. What else (beyond what you noted above) should we change next semester?
6. What were the best things about this course that we should not change?
