

**INST 346: Technologies, Infrastructure and Architecture**  
**Quiz 9, April 18, 2018**

**Instructions:**

This is a 7 minute quiz, starting promptly at 1:43 and ending promptly at 1:50. You may use any resources (Web, readings, class notes, class slides) that existed before the start of this quiz. You may not communicate with any other person (including the instructor) during the quiz. If you have difficulty interpreting a question, briefly describe that difficulty and any assumptions that you have made to allow you to answer the question and we will consider what you have written when grading your quiz. Answer all questions. A maximum of 1 point is available.

0. (0 points) What is your name?
  
1. (1 point) In class, I claimed that the Web is simply HTTP, HTML and URL's. Briefly explain how these three things work together to create "the Web." Then explain how by this narrow definition of the Web Google Maps would not be considered to be a part of "the Web" (i.e., what is it that Google Maps does – at the technical level – that can not be explained just with HTTP, HTML and URL's?).

Please **hand write and sign** the honor pledge on this quiz. (For reference, the honor pledge (described at <http://shc.umd.edu/SHC/HonorPledgeUse.aspx>) is: "I pledge on my honor that I have not given or received any unauthorized assistance on this quiz.")
