# Data Centers

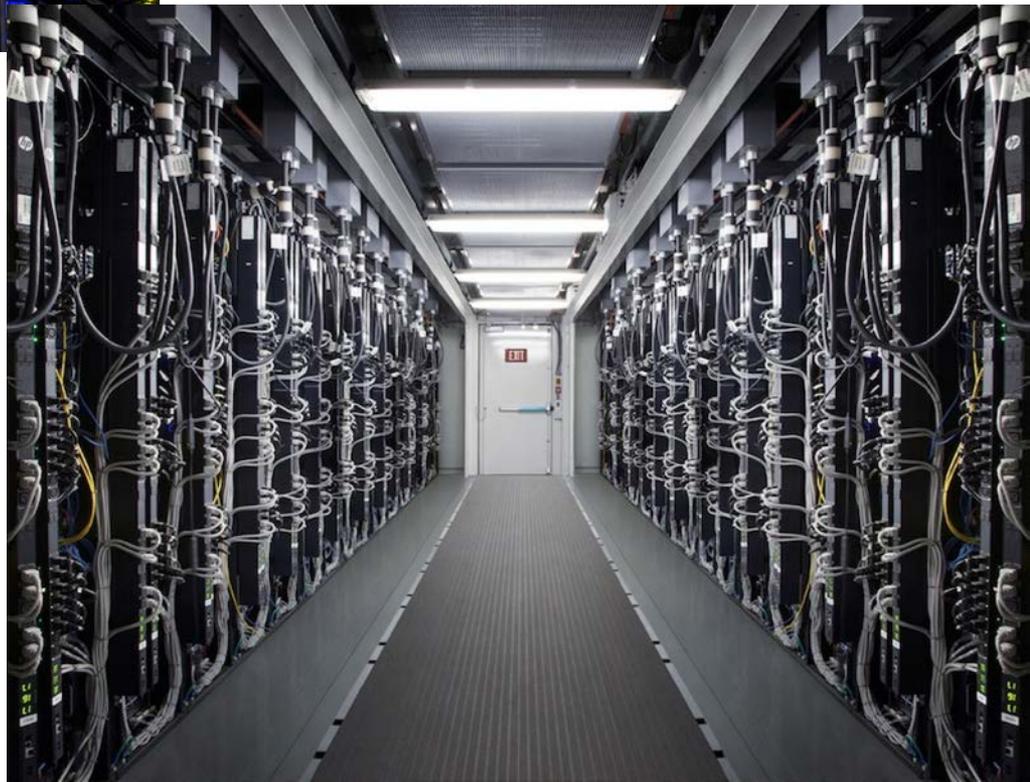

Session 36

INST 346

Technologies, Infrastructure and Architecture

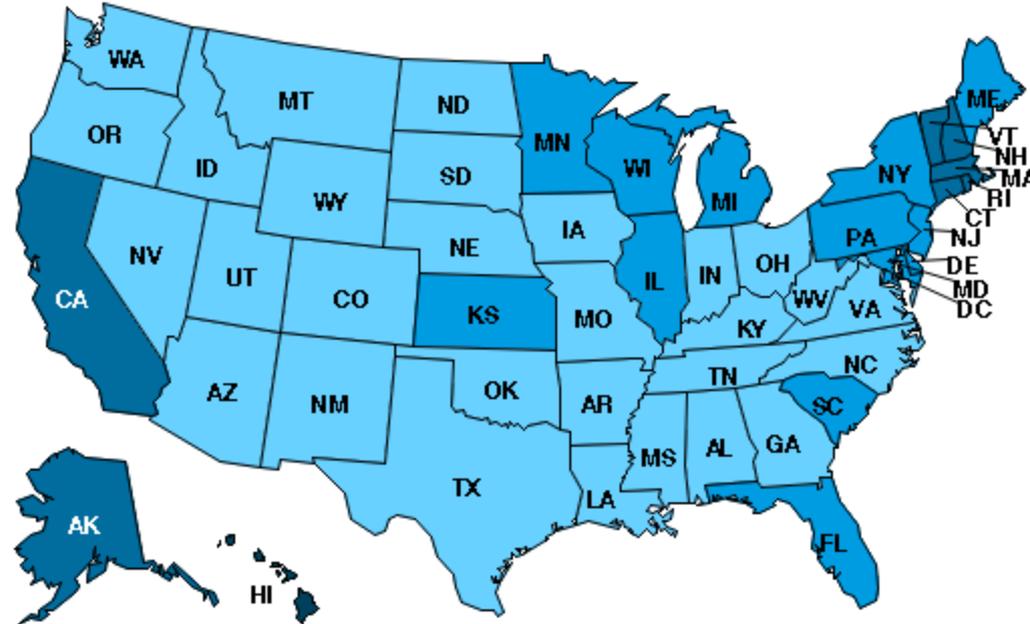

# Facebook Data Center, Dallas

# Electricity Costs

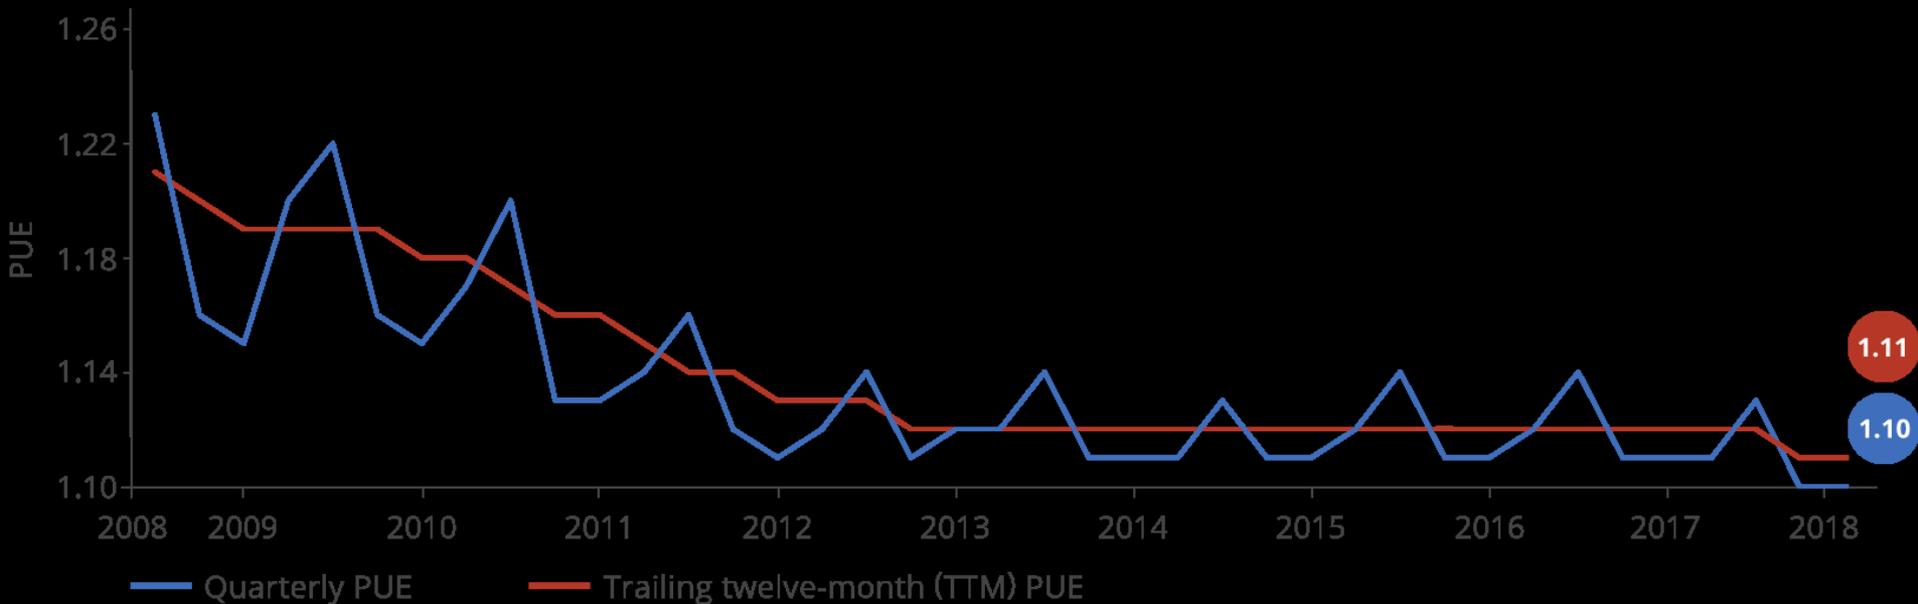

U.S. electric industry average revenue per kilowatthour  
January 2018, cents per kilowatthour

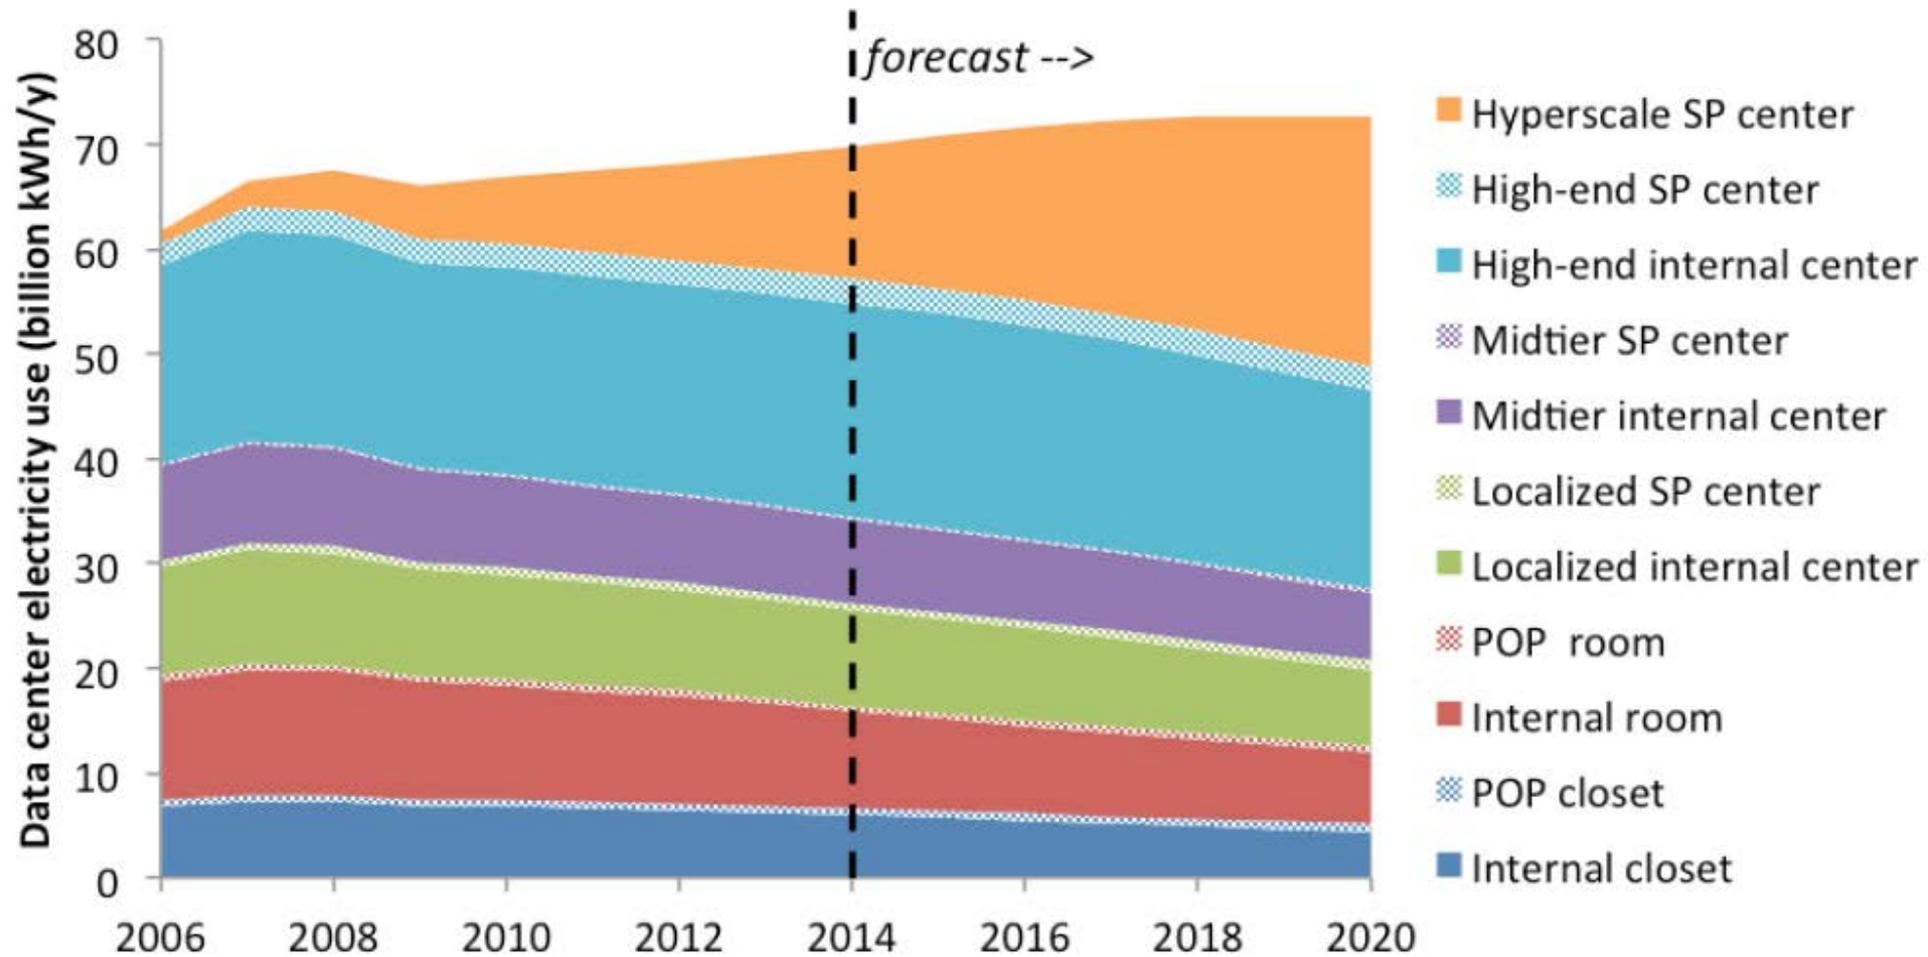

# Power Use Efficiency

## Continuous PUE Improvement

Average PUE for all data centers

# Electricity Use

## Data center locations

We own and operate data centers around the world to keep our products running 24 hours a day, 7 days a week. Find out more about our data center locations, community involvement, and [job opportunities](#) in our locations around the world.

### Americas

- [Berkeley County, South Carolina](#)
- [Council Bluffs, Iowa](#)
- [Douglas County, Georgia](#)
- [Jackson County, Alabama](#)
- [Lenoir, North Carolina](#)
- [Mayes County, Oklahoma](#)
- [Montgomery County, Tennessee](#)
- [Quilicura, Chile](#)
- [The Dalles, Oregon](#)

### Asia

- [Changhua County, Taiwan](#)
- [Singapore](#)

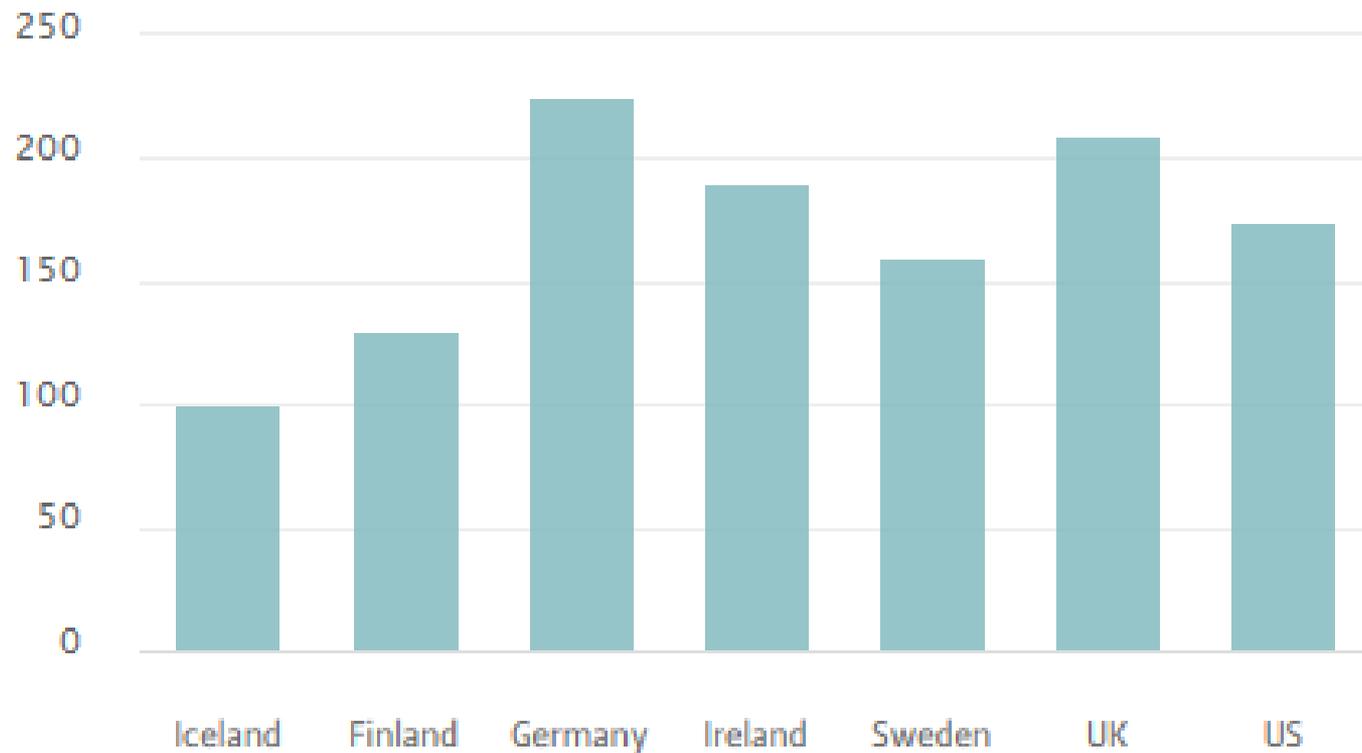

### Europe

- [Dublin, Ireland](#)
- [Eemshaven, Netherlands](#)
- [Hamina, Finland](#)
- [St Ghislain, Belgium](#)

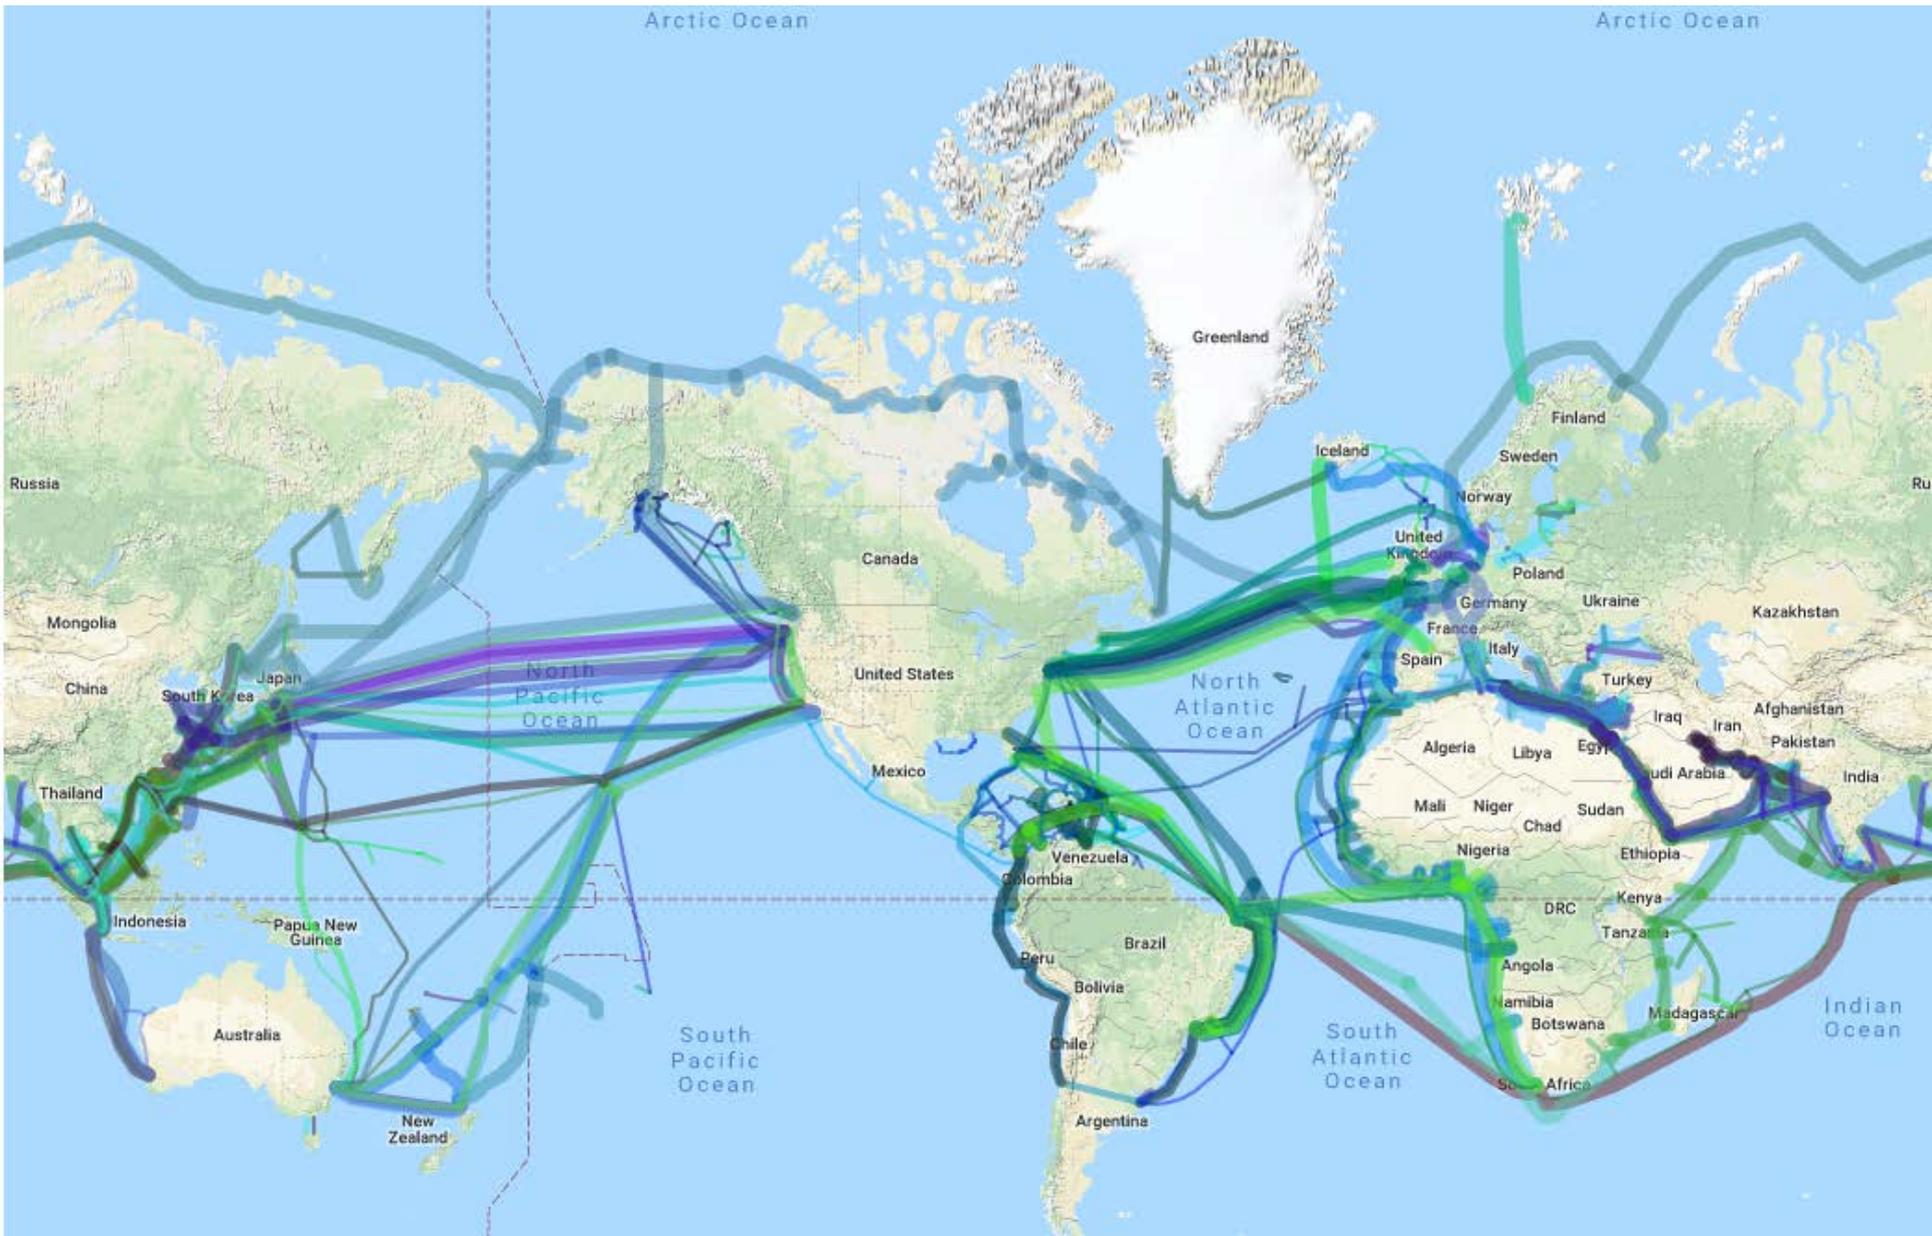

# Total Cost of Ownership

## 10 year cost of data center operations

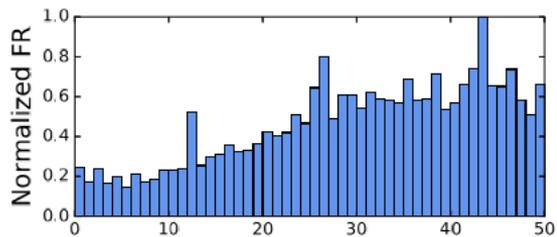

# “Submarine” Fiber Optic Cables

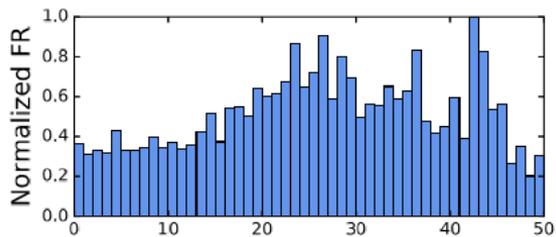

# Design for Failure

In each [1,800-server] cluster's first year, it's typical that 1,000 individual machine failures will occur; thousands of hard drive failures will occur; one power distribution unit will fail, bringing down 500 to 1,000 machines for about 6 hours; 20 racks will fail, each time causing 40 to 80 machines to vanish from the network; 5 racks will "go wonky," with half their network packets missing in action; and the cluster will have to be rewired once, affecting 5 percent of the machines at any given moment over a 2-day span, Dean said. And there's about a 50 percent chance that the cluster will overheat, taking down most of the servers in less than 5 minutes and taking 1 to 2 days to recover.

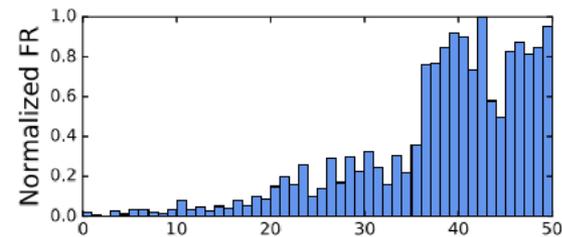

# Failure Rates

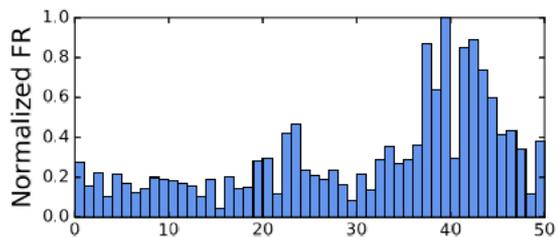

(a) HDD

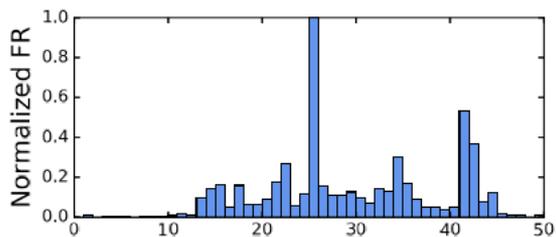

(b) Memory

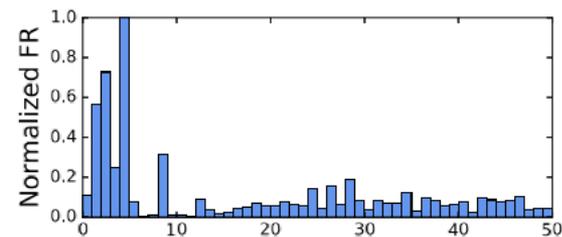

(c) Motherboard

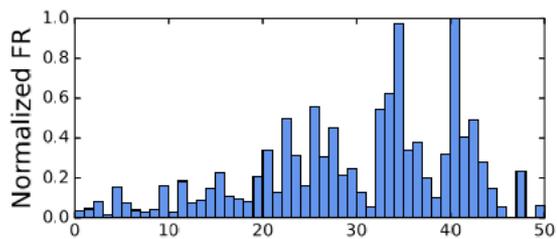

(d) SSD

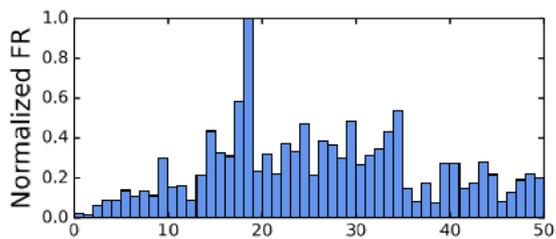

(e) Flash card

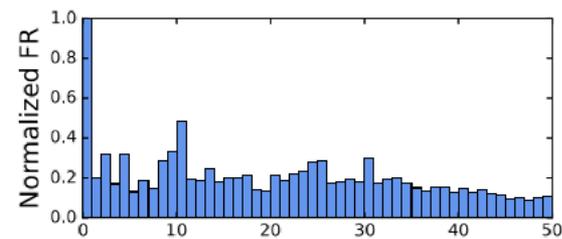

(f) Raid Card

(g) Fan

(h) Power

(i) Miscellaneous
